

Max Load : 10 kgs (5 kgs each side)

FPR-3000

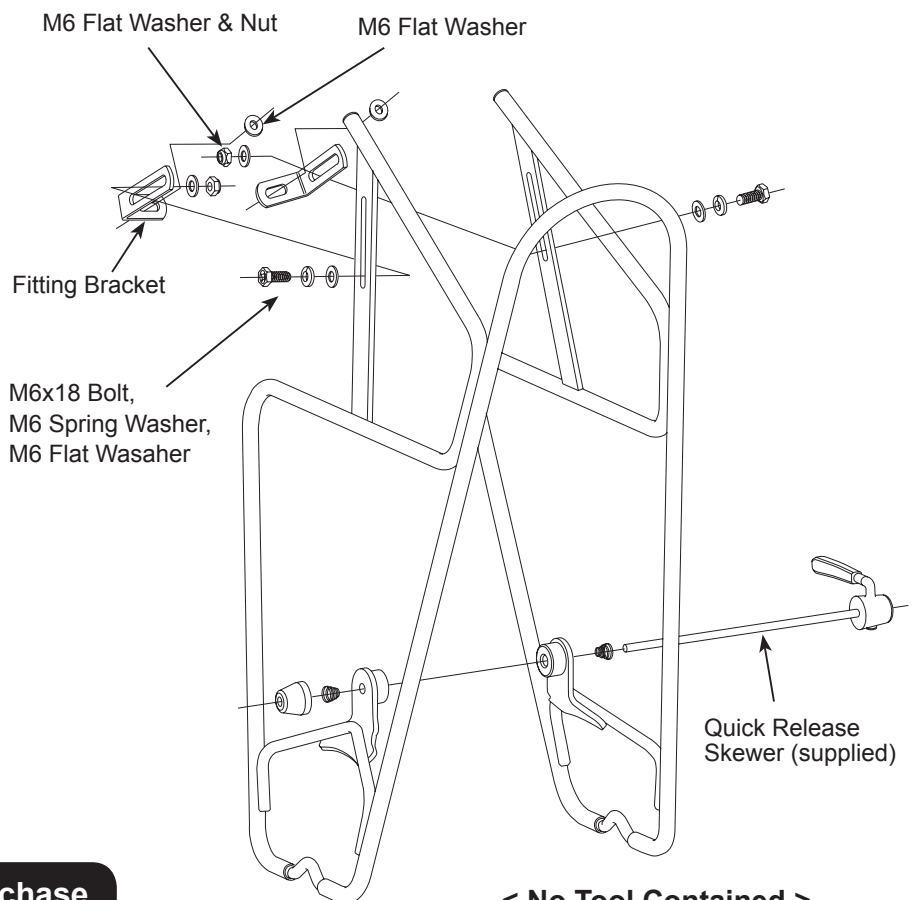

⚠ Caution

- **FPR-3000** is a front pannier rack for the bike which has 9mm standard quick release skewer and V-brake. Any other front forks (specialized for caliper brake, disc brake or for thru type axle) cannot be used with this rack.
- Requires disassembling V-brake. Ask to professional mechanics if you are not confident on re-assembling V-brake perfectly.
- This rack is designed for mounting pannier bags. It is not equipped with a standard top panel for mounting baggage on it. Choose the pannier bag with the hook for 10mm diameter tubing.
- Make sure all nuts and bolts are firmly tightened and always check for damage before each ride.

How To Install

- 1 At first, set the rack to the front wheel axle by replacing the quick release skewer to the supplied longer one.
- 2 Set the Fitting Bracket to the rack with the supplied bolt, nut and washers temporarily. Do on both sides.
- 3 Remove the brake pivot bolt (**do not remove the brake arm**) and install the Fitting Bracket above the brake arm. Tighten the pivot bolt with M6 flat washer firmly. Adjust the rack angle, then finally tighten M6x18 Bolt firmly.
